REEMAY

All Darlly filter cartridges use Reemay® spunbound polyester; a strong, high quality media used for over 30 years in the pool and spa industry.

The unique construction of cartridges incorporates even pleats that stay sharp for increased surface area and better filtering.

- ✓ **Balanced design**
- ✓ **High-performance**
- ✓ **Uniformity**
- ✓ **High strength and stiffness**
- ✓ **Exceptional dirt-holding capacity**

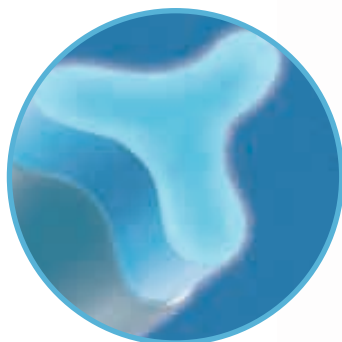

SILVER STREAM

Silver Ion Technology

Darby silver ion technology is incorporated within the end caps and core of SilverStream spa filter cartridges which are produced using Reemay® Microban antimicrobial filtration fabric, a unique combination that makes SilverStream cartridges the most advanced on the market.

The silver works continuously within the cap and core to provide on-going antimicrobial protection for the expected lifetime of the cartridges, while the Microban® media, a material exclusive to Reemay® ensures bacteria will not survive on the surface of a filter cartridge.

- ✓ **Anti Microbial Media**
- ✓ **Cleaner Filter**
- ✓ **Increased Life**

How to identify your spa filter cartridge.

- All genuine Darlly filters will have their part number printed on the end cap eg 60401.
- Pleatco, Unicel or Filber will sometimes have the part number on the end cap.
- If you can't find a part number, just use the following pages to identify the cartridge by a range of methods including; brand, end cap, top and bottom style or measurement.
- Failing all of this, call us on +44 (0)1271 378100 and we will be happy to help you.

How to measure a filter.

1. Outside diameter:

measure the width from left outer edge to right outer edge.

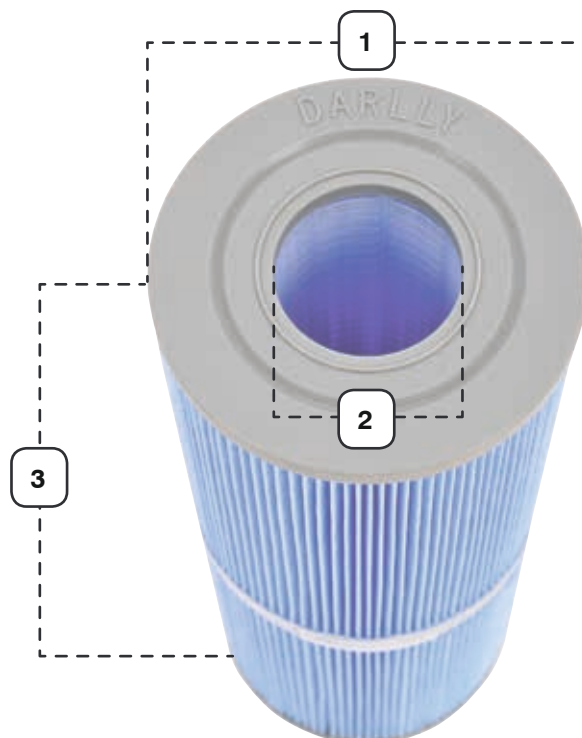

2. Inside diameter:

measure across the width of the cartridge on an open end.

3. Length:

measure the overall length of the cartridge but do not include handles, threads etc.

Filter measurements may vary. Always allow a variance of +/- 5 mm.

SC708

Golden Coast Code

76 23 273 121

Suitable for the following brands

- Sundance

Notes

- Sundance part numbers: 6540-488, 6540-501 & 502, 6540-507 (new MicroClean 2)
- This filter replaces both the standard filter cartridge and 5" disposable MicroClean element of a Sundance filter.
- This is a far more cost effective option since it avoids having to replace the MicroClean element every month. There is a bulkhead within the core.

Cyclone Filter Cleaner

- Cleaning your filter has never been easier!
- Cleaning your filter is imperative in maintaining crystal clear water in your hot tub, however, the task of cleaning a filter is not an easy one.
- Limescale, body grease, fats, flies, dead skin all end up in the pleats of your cartridge and until now removing such is nasty and arduous.
- The 'Brush and Flush' technique developed by leading cartridge manufacturers Darply now makes this task simple, effective and less stressful.
- Simply attach a hose and squeeze the trigger - the rounded brush head means it is simple for the water to get into each of the pleats and the deep brushes remove any debris.

Pure-Stream

- No more scale - no more hard water
- Hard water is NOT good for spas or hot tubs.
- Hard water will invariably damage/limit the efficiency of the heater.
- Fill spas using the Darply Pure-Stream De-Ioniser and you will be rid of all these problems.
- This is NOT the same as using a water softener - this device (which lasts for up to 6 FILLS* about 2 years) de-ionises the calcium thus rendering it harmless to the filtration system.
